Blue Tsunami®

Chelated Zinc

Blue Tsunami® is a 10% Chelated Zinc Fertilizer. Chelation protects Zinc from fixation by the soil. Soil applications of Zinc Chelate are not as readily tied up in the soil as inorganic sources (oxides, sulfates, etc.). The degree to which zinc remains available may vary based on crop, type of application, soil texture, soil pH, and other nutrients in the fertilizer so local recommendations may vary.

Application Directions

STARTER

General recommendations (depending on crop and soil fertility level) are 1-2 qt/A as a starter for moderate to highly sensitive crops such as Corn, Dry Beans, Potatoes, Sorghum, Soybeans, and Sugarbeets.

BROADCAST

1-4 qt/A broadcast for moderate to highly sensitive crops such as Corn, Dry Beans, Potatoes, Sorghum, Soybeans, and Sugarbeets.

Product Weight per Gallon

9.85 lb/gallon

Minimum Storage Temperature

None

Compatibility and Package Size

Blue Tsunami® has been shown to be compatible with most pesticides and some liquid fertilizers including 10-34-0. However a jar test may be needed to guarantee compatibility due to differences in the quality of specific water sources or specific fertilizers. Blue Tsunami is not compatible with orthophosphate fertilizers.

Blue Tsunami® is packaged in 2x2.5 gal and 250 gal containers.

Principal Functioning Agents

Total Nitrogen (N)8%

8% Ammonical Nitrogen

Zinc (Zn).....10%

Derived from Zinc Chloride, Citric Acid, EDTA Acid and Anhydrous Ammonia

Always read and follow label directions.
