Cornbelt® Guardian®

Multi-function Adjuvant

Cornbelt® Guardian® is a multifunctional drift and deposition management concentrate and water conditioning agent containing TransGard® Systems technology. Cornbelt® Guardian® minimizes spray fines due to atomization by maintaining the structure of the individual spray droplets as the spray passes through the spray tip while not disrupting the spray pattern. Cornbelt® Guardian® increases spray droplet retention on leaf surfaces while minimizing “bounce” and runoff. Cornbelt® Guardian® contains sequestering agents which help neutralize the negative effects of metal ions or other impurities present in hard water.

Application Directions

The use rate for Cornbelt® Guardian® is 1-3 quarts per 100 gallons of spray solution.

The minimum use rate is 1 quart per 100 gallons of spray solution. Higher spray pressure, small nozzle tip sizes or increased drift potential require higher use rates. Do not exceed 3 quarts per 100 gallons of spray solution.

Always read and follow product labels prior to use.

Package Size

Cornbelt® Guardian® is available in 2x2.5 gal, 30 gal and 110 gal containers.

Principal Functioning Agents

Ammonium Sulfate.....	20%
Glycerol/Acid (citrophosphate)- Acrylamide Sodium Acrylate Linear copolymer complex & siloxan.....	15%
INERT INGREDIENTS.....	65%
TOTAL	100%

Always read and follow label directions.
