

Cornbelt® Soy-Stik®

Methylated Seed Oil

Cornbelt® Soy-Stik® is a blend of methylated soybean oil and surfactant emulsifier specifically designed for use with post emergence herbicides.

Cornbelt® Soy-Stik® is a low foam methylated seed oil that provides excellent leaf penetration which will provide greater herbicide activity than traditional oil adjuvants.

Application Directions

Cornbelt® Soy-Stik® should be applied at rates recommended on the herbicide label. Typical use rates will be 1.5 – 2 pt/A or 1% v/v.

Package Size

Cornbelt® Soy-Stik® is available in 2x2.5 gal, 110 gal, Repack containers and Bulk.

Principal Functioning Agents
