

Complete Adjuvant System

Veracity combines the functionality of several individual adjuvant products into one easy to use formulation.

Veracity contains nonionic surfactants, water conditioning agents, deposition and drift management aids and defoamer. This combination of functioning agents improves the performance of glyphosate and many other herbicides requiring surfactant, water conditioning, deposition and drift management as well as reducing foam in the spray tank.

Veracity provides the convenience and simplicity of containing every likely additive the user needs in one easy to use formulation.

Application Directions

Use Rates for Ground and Aerial Application: 2 to 6 quarts per 100 gallons of spray solution.

The recommended rate for most uses is 3 quarts per 100 gallons.

Higher rates of 4+ quarts per 100 gallons are only necessary when maximum efficacy on large and/or stressed weeds is required, when maximum drift control is required or when extra defoamer is needed.

Package Size

Veracity is available in 2x2.5 gal containers, repack and bulk.

Principal Functioning Agents

Water conditioners, surfactants, defoamer, drift management agents, and inert ingredients 100%

Always read and follow label directions.
