

# VERACITY™ ELITE II

- All-in-One adjuvant
- Unparalleled low use rate
- Ensures on target application, mitigating risk for your ease of mind

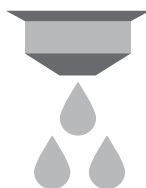

Veracity™ Elite II contains nonionic surfactants, water conditioning agents, deposition and drift management aids and defoamer. The unique combination of functioning agents improves the performance of glyphosate, dicamba, 2,4-D and many other herbicides that require or recommend surfactant, water conditioning, deposition and drift management as well as reducing foam in the spray tank.

## PRINCIPAL FUNCTIONING AGENTS

- 2-hydroxypropane-1,2,3 carboxylate, complex trihydric alcohols, oligomeric sugar alcohol condensat ..... 34.75%
- Constituents ineffective as spray adjuvants ..... 65.25%
- TOTAL ..... 100%

Veracity Elite II has been approved for use with Xtendimax herbicide and is listed on the [xtendimaxapplicationrequirements.com](http://xtendimaxapplicationrequirements.com) website as a Drift Reducing Adjuvant (DRA). When using Veracity Elite II with Xtendimax herbicide and Xtendimax tank-mixes, no other adjuvant is required. The deposition properties of Veracity Elite II further minimize fine spray droplets. The deposition properties also help to improve leaf coverage and pesticide performance by increasing retention and adhesion of the droplet, maximizing on target application and performance.

## APPLICATION DIRECTIONS

- **With Xtendimax**  
Consult [xtendimaxapplicationrequirements.com](http://xtendimaxapplicationrequirements.com) website for approved tank-mix partners.
  - Xtendimax herbicide at labeled use rate
  - Approved pesticide tank-mix partner at labeled use rate
  - Veracity Elite II at 5 pt/100 gallons of water
- **With Glyphosate**
  - Glyphosate herbicide at labeled use rate
  - Conventional tank-mix partner at labeled use rate
  - Veracity Elite II at 4 pt/100 gallons of water

**Consult pesticide labels for product use rates, instructions and proper mixing order.**

Veracity Elite II does not contain ammonium sulfate or acidify the spray solution but uses a proprietary water conditioning system that is compatible with a wide array of herbicides including those that contain glyphosate, dicamba, 2,4-D and many others. Humidome trials with Veracity Elite II have demonstrated minimal or no impact on increased dicamba volatility. Wind tunnel trials with Veracity Elite II have demonstrated reduced fine droplet formation from most pesticide spray solutions.

The Veracity Elite II application rate range is 2-8 pt/100 gallons of water with 4 pt/100 gallons being the most common.

## PACKAGE SIZES

- 2x2.5 gal
- 275 gal
- Repack containers
- Bulk
