Plants are complex. They need a balance of nutrients to grow into a real financial return. And as input costs continue to escalate, the return on micronutrients is getting bigger. Every field is different. So our nutrient products range from premium chelated nutrient sources to standard nutrient solutions.

AMMEND™ PREMIUM CHELATED MICRONUTRIENTS

AMMEND EDTA Chelated Zinc 9 Solution is designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 8% Nitrogen, 9% Zinc
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- 100% chelated with EDTA acid
- 1 gallon contains 1 lb. of elemental zinc
- Can be mixed with UAN, 10-34-0, ATS and orthophosphates

Product Information:
- pH: 7.0-9.0
- Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
- Weight/Gallon: 11.0
- Freeze Point: -18° F

AMMEND EDTA Chelated Zinc 9 Solution

Nutrition is the new age of agriculture.
AMMEND EDTA MAN 6 is an EDTA chelated manganese solution designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 6% Nitrogen, 6% Manganese
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- Product is 100% chelated with EDTA acid
- Can be mixed with UAN, 10-34-0, ATS, and orthophosphates

Product Information:
- pH: 6.5-7.5
- Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
- Weight/Gallon: 11.0

AMMEND HEDTA IRON 4.5 is an HEDTA chelated iron solution designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 2% Nitrogen, 4.5% Iron
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- Can be mixed with UAN, 10-34-0, ATS, and orthophosphates
- Product is 100% chelated with HEDTA acid

Product Information:
- pH: 5.0-7.0
- Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
- Weight/Gallon: 11.4

AMMEND EDTA COPPER 7.5 is an EDTA chelated copper solution designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 7% Nitrogen, 7.5% Copper
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- Can be mixed with UAN, 10-34-0, ATS, and orthophosphates
- Product is 100% chelated with EDTA acid

Product Information:
- pH: 6.2-7.2
- Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
- Weight/Gallon: 10.4

AMMEND MICRO PAK is a heavily chelated nutrient blend formulated for use with most soil applied liquid fertilizers and foliar sprays.
- Provides 4% Nitrogen, 5% Soluable Potash, 3% Sulfur, 0.5% Boron, 1% Manganese, 4.5% Zinc
- Designed for use with cropping systems that have shown to benefit from a nitrogen or potassium starter fertilizer application or have exhibited deficiencies to zinc, sulfur, manganese, or boron

Product Information:
- pH: 8.0-9.0
- Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
- Weight/Gallon: 10.95
AMMEND™ CHELATED MICRONUTRIENTS

AMMEND ZINC 10 is a citric chelated zinc solution designed for use in most soil applied liquid fertilizers.

- Provides 8% Nitrogen, 10% Zinc
- Can be splash blended with 10-34-0, requires little agitation
- 1 gallon contains 1 lb. of elemental zinc
- Designed for use with a wide range of agricultural crops

Product Information:

pH: 8.5-9.5

Package size: Bulk, 250 gallon shuttle,
2x2.5 gallon jugs

Weight/Gallon: 9.6

Soil Application
Freeze Point: 0° F
AMMEND MAN 5 is a chelated manganese solution designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 6% Nitrogen, 5% Manganese, and 3% Sulfur
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- Can be tank mixed with glyphosate
- Can be mixed with 10-34-0, UAN, and ATS

Product Information:
pH: 8.5-9.5
Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
Weight/Gallon: 10.4

AMMEND IRON 5 is a chelated iron solution designed for use in most soil applied liquid fertilizers and foliar sprays.
- Provides 6% Nitrogen, 5% Iron, and 3% Sulfur
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- Corrects iron deficiencies in crops while maintaining low input costs

Product Information:
pH: 8.5-9.5
Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
Weight/Gallon: 10.6

AMMEND AMMONIATED ZINC 15 is a zinc ammonium chloride solution designed for use in most soil applied liquid fertilizers.
- Provides 13% Nitrogen, 15% Zinc
- Designed for use with a wide range of agricultural crops, turf, ornamental, and greenhouse crops
- NOT intended for use with orthophosphates

Product Information:
pH: 9.0-10.5
Package size: Bulk, 250 gallon shuttle, 2x2.5 gallon jugs
Weight/Gallon: 10.20
